# **SKILLS**

Languages | Python, Java, JavaScript/TypeScript, C, SQL Technologies | React, Angular, Node, Postgres, Selenium Tools | Unix/Bash, AWS, GCP, Git, Jenkins, Docker

# **EDUCATION**

University of Victoria | 2015 - 2020 Bachelor of Software Engineering UVic Excellence Scholarship (top 5%)

#### **EXPERIENCE**

## Software Developer at University Health Network | Toronto ON

Sep 2020 - present

- Developed full-stack web apps with React, JavaScript, Docker, and Postgres to support researchers, clinicians, and patients.
- Implemented features for projects to support patient care, data aggregate dashboards, and COVID-19 research platforms.

## **Software Developer Intern** at SAP | Vancouver BC

Sep 2018 – Apr 2019

- Developed internal web tools to display performance metrics dashboard for cross-team communication.
- Developed performance and reliability analyses using **Java**, **Selenium**, **Jenkins**, and Fiddler. Analyzed response time, network usage, CPU usage and investigated regressions by using root cause analysis.

## Software Test Developer Intern at SMART Technologies | Calgary AB

Jan 2017 – Aug 2017

- Developed automated test scripts using **Python**, **Selenium**, Sikuli and maintained the TeamCity build pipeline.
- Participated in acceptance test-driven development, smoke testing, and load testing.

#### **PROJECTS**

# Facial Gesture Recognition | machine learning

Apr 2020 - Jul 2020

- A machine learning system that recognizes facial gestures in real-time with an emphasis on accessibility and interfacing support to improve technology accessibility.
- Implemented using **Keras**, **OpenCV**, and Kaggle training data.

Bountiful | web app Apr 2020 – Jul 2020

- An app for content creators and fans to interact. Developed using **Typescript**, **React**, and **Firebase**.
- Created full stack React components and integrated with the Firebase cloud store. Designed mock-ups with Adobe XD and used Notion for product management.

#### Mental Health Map | web app

Mar 2020

- An app to connect users to recommended mental health resources with a short diagnostic quiz.
- Developed using **Typescript**, Node, **MongoDB**, **GCP**, and Google Maps API.

Runaway | web app

Sept 2019 – Dec 2019

- An app made for travellers to review and browse other reviews of popular destinations.
- Developed (without a modern web framework) using **Typescript**, Node, **MongoDB**, and Pug.

VisualGit | git GUI May 2019 – June 2019

- A desktop app which opens git repositories in a visual, interactive user interface.
- Supervised a team of five developers as scrum master. Developed using **Typescript**, **Angular**, **Electron** and Node.

#### **Cloud Computing Cloud** | machine learning

May 2019 - Aug 2019

- A proof-of-concept machine learning, distributed system to detect clouds from satellite imagery.
- Developed using AWS EC2 instances, lambda functions, S3 buckets, and OpenCV.

#### **CLUBS AND ACTIVITIES**

nwPlus | Sept '19 – Apr '20 | Campus Ambassador. Promoted hackathons and events run by nwPlus.

Vikelabs | Sept '19 – Dec '19 | Team lead for the website team. Promoted workshops and fostered mentorship.

**SAP Intern Committee** | Sept '18 – Apr '19 | Promoted events for career development, networking, intern involvement.
